

**COUNTY OF YORK
VIRGINIA**

**VSMP
ANNUAL REPORT
FISCAL YEAR 2020**

Summary

This Annual Report is for Fiscal Year 2020 and is being submitted to the Department of Environmental Quality (DEQ) as part of the County of York's Virginia Stormwater Management Program (VSMP) Permit requirements for the Municipal Separate Stormwater System (MS4), Phase II locality.

The report addresses the status of the six minimum control measures for the fiscal year in York County plus Special Conditions.

The six measures and special conditions are:

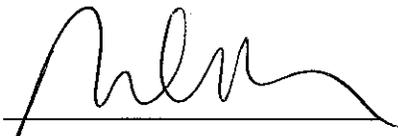

1. Public Education and Outreach
2. Public Involvement and Participation
3. Illicit Discharge Detection and Elimination
4. Construction and Stormwater Runoff Controls
5. Post Construction Stormwater Management
6. Pollution Prevention and Good Housekeeping
7. Special Conditions - Chesapeake Bay and Bacterial TMDL Action Plans

The County receives assistance with the program from the Hampton Roads Planning District Commission (HRPDC) on the educational, training, tracking and other permitting requirements.

Certification: "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations."

Date: 9/14/20

A. Reporting Items

1. Public Education and Outreach
 - (a) List of high-priority Items
 1. Pet Waste
 2. Lawn Care
 3. Disposal of Fats, Oils and Greases
 4. Pollution Prevention Education
 - (b) Strategies used to communicate issues
 1. See Attachment 1.b - High Priority Issues Education Plan
 - (c) York County's Public Education and Outreach is always evolving. We fully participate in HRPDC's education and outreach programs, with their TV and Radio advertisements. Additionally, York County has a dedicated education and outreach professionally assigned solely to the Department of Public Works. Our Outreach Coordinator participates regularly in local events and farmers markets to distribute HRPDC's literature as well as visit schools. We have a solid program and no changes are necessary.

2. Public Involvement and Participation
 - (a) Public input and Stormwater Complaints: See Attachment 2.a Stormwater Complaints Website address: <https://www.yorkcounty.gov/387/Stormwater-Programs>
 - (b) Public Involvement Activities
See Attachment 2.c – York County Public Involvement Activities and Metric Report
MS4 Permittees with whom we collaborate include the members of the Hampton Road Planning District Commission.
 - (c) York County has a very aggressive automated system for Public Involvement and Participation. Our citizens can report issues online or they can call Public Works were their concern will be addressed expeditiously, usually within 24 hours. Our reporting system receives the complaint and the person that handles the issues will provide the action that was taken. We have a solid program and no changes are necessary.

3. Illicit Discharge Detection and Elimination
 - (a) York County maintains our MS4 map and information table which is updated regularly.
 - (b) We have a dedicated illicit discharge inspector that oversees the program. He will accept the call, report out to the site

within 24 hours and provide corrective actions, if necessary. We have a solid program and no changes are necessary.

- (c) York County screened 60 outfalls.
- (d) Illicit Discharges reported in FY2019: York County received 4 illicit discharge complaints in FY2020. Out of the 4 illicit discharge complaints 3 were found to be illicit and 1 no apparent violations. Of the 3 that were illicit, they were resolved by sending one warning letter containing illicit discharge information.
 - 402 Second Street (Virginia Beer Company), the responsible party is the co-founders. County of York Stormwater employees made the call about a foul smell around the MS4 and possibly leaking into the neighborhood behind the parking lot. Spent grain from the brewing process had been allowed to drip into the curbside gutter and was making its way into the storm drains. An illicit discharge letter was sent out to the business and requested immediate action. An infiltration structure was installed to keep the discharge from entering drainage, the case was closed.
 - 1948 George Washington Memorial Highway (Off Leash K-9 Training), the responsible party is the business owner. A complaint of paint entering the storm drain was made (from the adjacent property – a junk yard). During renovations on the building the paint contractors had used a space of gravel as their paint washout – they were not aware this was part of a drain. An illicit discharge letter was sent and all parties involved discontinued the illicit activity, the case was closed.
 - Waterfowl Drive (703,705,707), the responsible party were homeowners. Three homeowners were using the same contractor so they could all have pools built. Stock piles of the excavated dirt had not been stabilized and were in risk of eroding into the stormwater pond behind the houses. An illicit discharge letter was given to the homeowner and the contractor was made aware. They agreed to have silt fence in that day and the dirt would be removed. A final inspection was made later that day and

the illicit actions had been corrected, and the case was closed.

- 204 Rich Road, the responsible party was the homeowner. County of York Stormwater employees noticed an oil sheen in a drainage easement with a full oil pan close by. The homeowner claims his mechanic did not take the oil after changing his oil, as he normally would, and may have leaked. At time of inspection the oil had been disposed of and no trace of oil was visible in the easement; the case was then closed.

4. Construction Site Stormwater Control

- (a) All land disturbing projects are conducted in accordance with the current approved standards for erosion and sediment control.
- (b) Total Inspections:
 - a. Erosion and Sediment Control: 1,821
 - b. Notice to Comply: 21
 - c. Stop Work Orders: 2
 - d. VSMP Inspections: 217

York County has a first class Construction Site Stormwater Runoff Control Program. We currently have 5 inspectors supervised by a Project Manager all of whom are dual certified in Stormwater and E&S inspecting. We often conduct inspections with Courtney Smith of the DEQ Tidewater Office and she has nothing but praise for our program. The program is very effective and no changes are necessary at this time.

5. Post Construction Stormwater Management

- (a) York County inspected 171 privately owned stormwater management facilities in 2020.
- (b) Enforcement actions are shown in Attachment 5.b – BMP Inspections Report
- (c) 35 inspections were done on County owned facilities
- (d) No significant repairs were required on any county owned facilities. York County submitted all required stormwater facilities information through the VCSGP database for projects that required VPDES Permits.
- (e) All BMPs were uploaded electronically into the DEQ BMP Warehouse on September 16, 2019. All BMP's within FY20 have been inputted into the database.

- (d) We have a dedicated Post-Construction Stormwater Inspector.

With the loss of our full time BMP inspector, we have assigned one of our construction inspectors to do the post-construction inspections. We will have the inspections meeting the once every 5 years for private BMP's and once yearly for County owned BMP's requirement. Due to the COVID shutdown, we did have less BMP inspections for FY2020. Our inspector is currently making up for the lack of inspections, which was out of the County's control. We have a solid program and no changes are necessary.

6. Pollution Prevention and Good House Keeping

- There were no changes to operational procedures during the reporting period.
- There were no new SWPPPs developed during the reporting period.
- No SWPPPs were modified or delisted during the reporting period.
- See Attachment 6.d – Training Plan
- York County has 131.48 acres under a nutrient management plan approved by DCR on January 9, 2019. A copy of the nutrient management plan and a list of all locations with longitude and latitude is on our York County Website.
- We hired a new illicit discharge training inspector the first of the year, but due to COVID, we were not able to have training done until August 2020.
- York County conducts Pollution Prevention and Good Housekeeping inspections yearly. Our locations are limited to a school bus parking and maintenance facility and our own vehicle maintenance/grounds operation yard. No changes necessary at this time.

7. TMDL Special Conditions:

- (a) Chesapeake Bay TMDL Action Plan: See Attachment 7.a-Phase II Chesapeake Bay TMDL Action Plan
- (b) Bacteria Action Plan: York County is providing dog waste stations to subdivisions, discouraging geese as well as implementing an enhanced dry weather screening and illicit discharge detection program.

High Priority Issue Rationale for Selecting this Issue

Target Audience

Strategies Used

Anticipated Schedule -
FY20 and beyond

High Priority Issue	Rationale for Selecting this Issue	Target Audience	Strategies Used	Anticipated Schedule - FY20 and beyond
1 Pet Waste: Scoop the Poop	Reducing impacts to waterways with local bacteria impairments and seasonal algal blooms	Dog owners	Paid media campaign (TV, radio, newspapers)	Ongoing
			askHRgreen e-newsletter and social media posts	Each Summer
			Green Learning Guide for every 3rd grader	Online/Ongoing
			Pet waste stations provided by askHRgreen.org	Fall 2019
			Printed brochures	Ongoing
2 Lawn Care	Reducing algal blooms and nutrients concentrations in surface waters	Homeowners	Promotional items - Dog waste bag holders, bumper stickers, and hand sanitizers	Ongoing
			Information on askHRgreen.org	Ongoing
			Paid media campaign (TV, radio, newspapers)	through HRPDC
			askHRgreen e-newsletter and social media posts -fertilizer and lawn debris	Each Spring
			Rainbarrel Workshops	Each Fall
3 Proper Disposal of Fats, Oils, and Greases (FOG)	Preventing sanitary sewer overflows caused by improper disposal of fats, oils, and grease	Restaurant owners and employees, grease haulers, and general public	Promotion of soil test kits	Spring 2019
			"Drains to Waterways" storm drain medallions	Spring 2019
			Printed brochures	Ongoing
			Promotional items - message pens, soil test kits	Ongoing
			Information on askHRgreen.org	Ongoing
4 Pollution prevention education to commercial entities: 1) Auto Care Businesses, 2) Pet Care/Groomers /Boarding Businesses, 3) Landscaping and Lawn Service Providers	Prevention of illicit discharges from businesses most likely to contribute oils, bacteria, and nutrients	Owners and employees of businesses most likely to contribute oils, bacteria, and nutrients	Paid media campaign (radio ads, social media ads, and targeted display ads)	Nov. and Dec. 2019
			askHRgreen e-newsletter and social media posts	Each Winter
			Training and certification website - www.HRFOG.com	Ongoing
			Promotional items - grease can lids, scrapers, sponges, sink strainers	Ongoing
			Printed brochures	Ongoing
4 Pollution prevention education to commercial entities: 1) Auto Care Businesses, 2) Pet Care/Groomers /Boarding Businesses, 3) Landscaping and Lawn Service Providers	Prevention of illicit discharges from businesses most likely to contribute oils, bacteria, and nutrients	Owners and employees of businesses most likely to contribute oils, bacteria, and nutrients	Information on askHRgreen.org	Ongoing
			Bay Star Businesses program	Ongoing
			Rack card brochures tailored to each business type	varies locations
			Direct mailing to landscapers	Ongoing
			Promotional items - Bay Star Businesses window clings and notepads	Ongoing
4 Pollution prevention education to commercial entities: 1) Auto Care Businesses, 2) Pet Care/Groomers /Boarding Businesses, 3) Landscaping and Lawn Service Providers	Prevention of illicit discharges from businesses most likely to contribute oils, bacteria, and nutrients	Owners and employees of businesses most likely to contribute oils, bacteria, and nutrients	Information on askHRgreen.org	Ongoing
			Bay Star Businesses program	Ongoing
			Rack card brochures tailored to each business type	varies locations
			Direct mailing to landscapers	Ongoing
			Promotional items - Bay Star Businesses window clings and notepads	Ongoing

Attachment 2.c: York County Public Involvement Activities and Metric Report 2020

1. York County personnel/committee members attended 4 farmers markets for FY20 with a display and educational information in forming the citizens of the importance of keeping the water ways clear for flood and mosquito control along with litter control and recycling, and information on illicit discharges.
2. York County personnel/committee members attended at least 4 Youth Education events to promote litter control and trash-free waterways.
3. In FY20, York County Beautification Committee promoted our Community Cleanup and Adopt-A-Spot Programs on web and social media to promote clear, litter-free waterways.
6. York County conducted 5 household chemical collection events in FY20 where residents could properly dispose of unwanted household chemicals.
7. York County has distributed 2,000 copies of its “Beautiful York County Calendars” which includes articles concerning flood control, environmentally-friendly disposal processes, clean waterways, mosquito control and litter control.
8. The County publishes a quarterly newspaper which include articles on illicit discharges, drainage and mosquito control. Feature article in FY20 on BMP importance and maintenance.
9. York County participates in the regional askHRgreen.org “Write as Rain” stencil program, distributes pens containing branding messages such as “Only Rain Down the Storm Drain.”
10. The County distributed one pet waste stations to local Home Owners Associations to reduce the amount of pet waste in local waterways.
11. York County personnel reads to second and third grade classes about the importance of clean waterways and environment (The Berenstein Bears "Go Green").

**BMP Inspections
FY2020**

<u>Insp #</u>	<u>Date</u>	<u>Basin ID</u>	<u>Basin Description</u>	<u>COMMENTS</u>
330746	07/01/2019	68Y020	MARQUIS POND 3	slopes were grown up, recommend at least one mow along the slopes annually to ensure woody vegetation is controlled. A tree has fallen on the outlet structure. Should be removed.
330747	07/01/2019	68Y018	MARQUIS POND 1A	grass was too tall to do an appropriate inspection. Recommended grass cutting for slopes at least once annually.
330748	07/01/2019	68Y019	MARQUIS POND 2	grass was too tall to do an appropriate inspection. Recommended grass cutting for slopes at least once annually.
330749	07/01/2019	68Y020	MARQUIS POND 3	grass was too tall to do an appropriate inspection. Recommended grass cutting for slopes at least once annually.
330823	07/08/2019	21C119	VICTORY ESTATES BMP A	Both BMPs look well maintained. The BMP on Collington Run looks good. A portion of the BMP appears to have a meadow like buffer. There is possible pond weed at the edges. It does not appear to be a problem at this time. There is a recommendation to mow to the water line at least once annually to eliminate woody vegetation. The BMP on Tabb appears to also be well maintained and functioning, however, the outfall pipe had some growth so I was unable to inspect to see if there were blockages. There appears to possibly be some build up of debris around the mouth of the pipe which could slow down drainage out of the pond. If this is the case, it is recommended that it be cleaned out. Otherwise, over all, both ponds look good.
330824	07/08/2019	21C120	VICTORY ESTATES BMP B	Both BMPs look well maintained. The BMP on Collington Run looks good. A portion of the BMP appears to have a meadow like buffer. There is possible pond weed at the edges. It does not appear to be a problem at this time. There is a recommendation to mow to the water line at least once annually to eliminate woody vegetation. The BMP on Tabb appears to also be well maintained and functioning, however, the outfall pipe had some growth so I was unable to inspect to see if there were blockages. There appears to possibly be some build up of debris around the mouth of the pipe which could slow down drainage out of the pond. If this is the case, it is recommended that it be cleaned out. Otherwise, over all, both ponds look good.
330826	07/08/2019	21C142	WOODS OF TABB	Association manager, Sarah Kraub, voiced possible concern over the lack of water in wetland. I inspected the pond and it had rained the evening prior. I explained that due to the treatment of alligator weed, there is no vegetation and the heat paired with the cleaning of the outfall pipe may make it appear dry. The water was leaving via the outfall pipe more swiftly than previously observed. The vegetation from one of the inlet pipes was also removed. Looks good.

<u>Insp #</u>	<u>Date</u>	<u>Basin ID</u>	<u>Basin Description</u>	<u>COMMENTS</u>
331554	07/10/2019	67Y009	BUSCH INDUSTRIAL PARK	Per Paul Sansome's request, I inspected the dam to see if work needed to be done around outfall structure. It does appear that there is some debris and sediment that needs to be removed. He stated that he would do that during routine maintenance scheduled in November.
331559	07/23/2019	67Y011	COLONIAL COMMUNITY SER	deteration basin looks good. There is a portion of silt fencing in the basin used to block debris from clogging the outfall. They were given the okay to do this a couple of years ago.
331560	07/23/2019	68Y006	CALLAHAN VILLAGE	the detention basin is functional. It appears there is some erosion along the concrete swale past the outfall structure. This is either a VDOT or County easement.
332603	07/23/2019	67Y007	BRUTON GLEN	older bmp, outfall appears to be working, looks okay
331545	07/25/2019	21C068	LAKES AT DARE BMP H	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331546	07/25/2019	21C069	LAKES AT DARE POND A	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331547	07/25/2019	21C070	LAKES AT DARE POND B	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331548	07/25/2019	21C071	LAKES OF DARE POND C	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331549	07/25/2019	21C072	LAKES AT DARE POND D	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331550	07/25/2019	21C073	LAKES AT DARE POND E	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331551	07/25/2019	21C074	LAKES AT DARE POND H	walked all BMPs, there is a vegetated buffer. Previously HOA stated they were doing selective removal of woody vegetation. Water appears to be flowing and overall BMPs are in good shape.
331552	07/25/2019	22C081	YORKSHIRE DOWNS POND F	Received complaint about sinkholes along Ascot, did a once over of both ponds despite doing an inspection the prior month in case there were sinkholes. both bmps are functioning and no associated sinkholes.
331553	07/25/2019	22C080	YORKSHIRE DOWNS POND E	Received complaint about sinkholes along Ascot, did a once over of both ponds despite doing an inspection the prior month in case there were sinkholes. both bmps are functioning and no associated sinkholes.

<u>Insp #</u>	<u>Date</u>	<u>Basin ID</u>	<u>Basin Description</u>	<u>COMMENTS</u>
332797	09/19/2019	67Y001	7-ELEVEN BYPASS	This was a follow up to the initial complaint based inspection. The letter requested that the basin be mowed and if sediment was found to be blocking the inlets, it should be removed. The basin was mowed, but there is sediment blocking the inlets. Another letter was sent and another inspection will be conducted on or around 10/20/2019.
333297	09/20/2019	67Y108	WYNDHAM PATRIOTS PLACE	the basin itself appears to be functional, however, there erosion on the dam side. The stormwater runoff appears to be an issue as it was an issue previously and was corrected, but there are still issues with active erosion and the stone that was placed along the dam to block erosion may have shifted downward. The entire dam side needs repair.
333295	09/20/2019	67Y072	WYNDHAM PATRIOT PLACE	wetland looks good, however, woody vegetation near headwall should be removed. Otherwise, vegetation and wetland appear to be functional and okay.
333386	10/08/2019	67Y082	THE RESERVE	Received a complaint regarding the front BMP was being pumped of water. There was a visual confirmation regarding the pumping of water. Staff did not request maintenance, so therefore, the responsible party will be contacted and follow up regarding the reasoning.
333761	10/17/2019	67Y018	COUNTRY INN AND SUITES	the basin has been cleared of small trees as requested.
333760	10/17/2019	67Y001	7-ELEVEN BYPASS	inlets have been cleaned out. Maintenance has been completed as requested.
333737	10/24/2019	67Y016	COMMUNITY SERVICES COA	looked good, plants still healthy, behind shed in rear of property
333738	10/24/2019	67Y035	DOMINION WALLER MILL INF	looks good, functional and well maintained
333739	10/24/2019	67Y036	DOMINION WALLER MILL EX	looks good, functional and well maintained
336144	01/09/2020	69Y012		New BMP, recommend routine swale cleaning by ditch crews. Review in growing season for plantings in aquatic bench. Goose netting is still in place, Not working
336206	01/15/2020	67Y114	YORK COUNTY BRUTON HIG	Appears to be functioning correctly
336207	01/15/2020	67Y110	YORK COUNTY BRUTON HIG	Appears to be functioning, routine light cleaning recommended

York County Training Plan 2020

1. Recognition and Reporting of Illicit discharges
 - a. Training in Good House Keeping Plan
 - b. All stormwater maintenance crew members will be trained biannually in recognizing and reporting illicit discharges.
 - c. Computer training provided August 2020 on stormwater pollution and green infrastructure solutions.

2. Pollution Prevention in Road, Street and Parking Lot Maintenance
 - a. See Good House Keeping Plan

3. Pollution Prevention and Good House Keeping in Maintenance and Public Works Facilities
 - a. Facilities superintendents meet with York County Stormwater Inspector yearly to go over Good House Keeping Inspection Report
 - b. FOG inspector attended the IW's Grease Interceptor Training in Hampton Roads, VA.

4. Pesticide and Herbicide Certifications
 - a. All three York County stormwater maintenance crew leaders hold a Category 60 license.
 - b. The York County Mosquito Control Superintendent and the Biologist hold Category 7 (General Pest) licenses. All remaining Mosquito Control Employees hold Category 60.
 - c. York County Public Works have 40 employees with Category 60 licenses and 11 employees with Ornamental/Turf - 3A/3B licenses.
 - d. The Grounds division has 7 supervisors with 3 of them holding category 6(right of way) licenses.

5. Erosion and Sediment Control and Stormwater Certifications
 - a. York County Stormwater Division has 2 Professional Engineers with one being a Certified Dual Program Administrator and the other a Certified Dual Combined Inspector/Plan Reviewer/Program Administrator, 1 Dual Certified Program Administrator, 6 Certified Stormwater Inspectors, and 6 Certified Erosion and Sediment Control Inspectors

6. Erosion and Sediment Control And Stormwater Certifications: See above.

7. Emergency Spill Response

- a. All FLS employees (uniformed firefighters) are minimally trained as Hazardous Materials Awareness/Operations Level Responders.**
- b. VDEM/VDFP Haz-Mat Awareness/Operations Hazardous Materials First Responder - Awareness/8 Hours, Available through: VDEM, VDFP, VAVRS. This course is designed for anyone who may discover the unplanned release of a hazardous material. The program teaches the use of the USDOT Emergency Response Guidebook, Material Safety Data Sheets, and DOT placards and labels, as well as safety and planning information.**
- c. Recertification: Students must recertify/demonstrate competency annually at this level or complete the Hazardous Materials First Responder - Operations course**
- d. Hazardous Materials First Responder - Operations/32 Hours, Available through: VDEM, VDFP. This course is designed for individuals who must respond to a release of hazardous materials and perform defensive operations. The program includes information taught in the HMFR Awareness course. The course is designed to meet the recommendations of NFPA 472 and OSHA 1910.120 (q)(6)(ii). The course teaches first responders incident stabilization techniques such as incident profiling, hazardous materials behavior modeling, incident planning and the Incident Command System. In addition to incident stabilization techniques, first responders learn defensive tactical control skills including damming, diking, diversion and retention of products, and decontamination of personnel.**

CITY OF WILLIAMSBURG
Public Works & Utilities Department

June 17, 2020

Mr. Joseph Brogan, P.E.
Stormwater Division Chief
Department of Environmental and Development Services
County of York
P.O. Box 532
105 Service Drive
Yorktown, VA 23690-0532

RE: MS4 Interconnectivity Notice

Dear Mr. Brogan:

Pursuant to the Virginia General Permit for Discharges of Stormwater from Small Municipal Separate Storm Sewer Systems (MS4) (VAR040027), this letter shall serve as notification of interconnectivity with the City of Williamsburg system to adjacent MS4 permit holders.

Based upon our analysis of our current system, the County of York (VAR040028) MS4 system does not interconnect with the City of Williamsburg MS4. There are however, numerous locations along the corporate boundary with York County that have streams that receive flows from outfalls for both jurisdictions as well as VDOT. In addition, the City is a large landowner in upper York County, the location of the Waller Mill Reservoir, and we have a vested interest in maintaining water quality in that watershed.

Thank you for your time and consideration of the above matter. If you have any questions or require additional information, please do not hesitate to contact me at (757) 220-6140.

Best regards,

Aaron B. Small, P.E.
City Engineer

Subject: York County Nutrient Management Plan Approval

The following nutrient management plan has been reviewed by Nick Yakish and confirmed by the Virginia Department of Conservation & Recreation to be developed in accordance with the Code of Virginia 10.1-104.2. Please note that this plan has not been reviewed for compliance with more restrictive requirements from other specific legislative, regulatory or incentive programs.

Plan Name	Planner	Acres	Start Date	Expiration Date
York County	Angela Whitehead	131.48	3/1/2019	3/1/2022

A copy of this letter should be kept with your nutrient management plan. Initiation of plan revision is recommended by the Department to occur at least six months prior to the expiration date. If you have any questions concerning this letter or reviews, please contact me via phone or email.

Sincerely,

A handwritten signature in blue ink, appearing to read "Nick Yakish".

York County Update to Our Bacteria TMDL Action Plan

April 29, 2020

In accordance with our MS4 Permit, our Bacteria TMDL Action Plan is required to be updated in to meet conditions of Part II B 4 of our MS4 Permit.

Part II B 4 of our MS4 Permit requires York County to adopt three strategies from a selection of strategies listed in Table 5 located in Part II B 4 of our permit. We have selected the following strategies:

Domestic Pets: York County provides pet waste stations to subdivisions and apartment complexes to help control pet waste. We protect our riparian buffers as well as buffers on all water supply reservoirs. York County currently has no dog parks; however, if we do acquire any in the future, we will endeavor to keep them out of environmentally sensitive areas.

The Beautification Committee (YCBC) participates in Yorktown Market Days at least one weekend per month from April – October. “Scoop the Poop” is one of the primary educational messages at these events. We distribute hundreds of bone-shaped pet waste bag dispensers and refills and travel-size hand sanitizer, discuss the dangers of nitrogen and bacteria making their way into our stormwater and local waterways, and provide promotional materials such as rack cards and brochures. We participate at local home shows in the askHRgreen.org trailer, where we promote the same message with these promotional items as well.

YCBC purchased 150 pet waste bag dispensers which were distributed at events such as Safety Town and the markets. York County Tourism also holds an annual “Paws at the River” market. The YCBC also provides them the pet waste dispensers and refills and educational materials to Village Events to be distributed to pet owners at that event.

Illicit Connections and Discharges: York County has implemented an enhanced dry weather screening and illicit discharge detection and elimination program. We currently inspect at least 60 outfalls. We have acquired a software program called “Survey123 and Collector” which enables our stormwater maintenance crew leaders to record and report any issue they discover in their day to day operations. They can also utilize the program to conduct outfall inspections and fill out our outfall inspection form electronically.

York County has a septic tank pump out program where every septic system is required to be pumped out at least every 5 years which helps to identify any failing systems and insures it is looked at least every 5 years. However, the most important thing we doing is eliminate septic systems altogether. Since 2009, York County has eliminated over 1,100 septic systems by installing sanitary sewer systems throughout the County.

York County also has an enhanced educational program. We have a dedicated public outreach coordinator who attends numerous outreach programs and travels to the local elementary schools where she reads environmental sensitive stories such as “Bernstein Bears Go Green” and distributes environmental comic books such as PW Paw (an environmental super hero tiger) vs a litter/illicit discharge monster.

Bird/Canada Geese Control: York County is start a Canada geese control program. As part of the program, York County encourages buffers on HOA owned ponds and we maintain buffers on all county owned ponds. We also provide information to HOAs on Humane Society approved

goose control methods. York County has personnel licensed by the Dept of Fish and Wildlife to addle goose eggs as needed. Currently, we only intend to addle eggs on York County property, we will use 100% corn oil as our method; only oil eggs that have been incubating for less than 14 days using the Float test; and only addle from March 1st-June 30th.

Public Comment Period: York County has provided 15 days for public comment from April 13, 2020 to April 28, 2020. The action plan and this update was available for review on the County website. We received two comments. One was thanking us for making it so easy to find and another was requesting that we addle eggs on HOA property. We have determined that addling eggs on private property would not be part of our plan.

Subject: MS4 Annual Report Review

Dear Mr. Taylor:

Thank you for your review of York County's 2019 MS4 Annual Report. We received your letter dated October 21, 2020 and offer the following to address your concerns.

1. In accordance with Part I.E.3.e.(3)(a)-(f) of the MS4 permit, the permittee is required to submit with the annual report a list of illicit discharges to the MS4 including spills reaching the MS4 with the following information: the source of the illicit discharge, the dates that the discharge was observed reported or both, whether the discharge was discovered by the permittee during dry weather screening reported by the public, or other method (describe), how the investigation was resolved, a description of any follow-up activities and the date the investigation was closed. The permittee provided descriptions of four illicit discharge investigations for the FY2020 annual reporting period but neither included the date the discharge was discovered (or reported) nor the date the investigation was closed. Please provide the dates of each illicit discharge's discovery and the date that each investigation was closed.
 - a. 402 Second Street (Virginia Beer Company), the responsible party is the co-founders. On the morning of May 28, 2020 County of York Stormwater employees reported a foul smell around the MS4 and possibly leaking into the neighborhood behind the parking lot. A few hours later County staff investigated and found spent grain from the brewing process had been allowed to drip into the curbside gutter and was making its way into the storm drains. An illicit discharge letter was sent out to the business the next day and requested immediate action. They promptly moved the trailer back as so it would not leak into the parking lot, drain field. An infiltration structure was installed by the co-founders over the next month to keep the waste contained. The case was closed July 2, 2020 as the curbside gutter had been

cleaned up and the source of the complaint discontinued and mitigated for future use.

- b. 1948 George Washington Memorial Highway (Off Leash K-9 Training), the responsible party is the business owner. A complaint of paint entering the storm drain was made (from the adjacent property – a junk yard) on April 9, 2020. April 9, 2020 County staff inspected the complaint and found that during renovations to the K-9 training facility the painting contractors had used a space of gravel as their paint washout – they were not aware this was part of a drain. An illicit discharge letter was sent and all parties involved discontinued the illicit activity, the case was closed on the same day.
 - c. Waterfowl Drive (703,705,707), the responsible party were homeowners. On June 5, 2020 we received a complaint that three neighboring homeowners were having pools built and that the excavated dirt was getting into the stormwater pond behind their houses. County staff investigated that day and found all three homeowners were using the same contractor, and all three requested that the contractor use the dirt to grade their back yards to the pond to facilitate mowing their properties (existing grade was steep). Additionally, extra stock piles of the excavated dirt had not been given protective measures and were in risk of eroding into the stormwater pond. It was not evident that any loose soil had made it into the pond at that time however heavy rains were forecast. The homeowners and contractor were made aware that this was an instance of illicit discharge on site. They agreed to have silt fence in that day and the stockpile would be removed. A final inspection was made later that day and found silt fencing was in place and that the stockpile had been removed. The case was closed same day, June 5, 2020.
 - d. 204 Rich Road, the responsible party was the homeowner. On April 6, 2020 County of York Stormwater employees noticed an oil sheen in a drainage easement with a full oil pan close by. During the inspection on April 9, 2020 the homeowner claimed his mechanic did not take the oil after changing his oil, as he normally would, and may have leaked. At time of inspection the oil had been disposed of and no trace of oil was visible in the easement; the case was then closed April 9, 2020.
2. In accordance with Part I.E.6.q.(5)(a)-(c) of the MS4 permit, the permittee is required to provide a list of the training events performed during the reporting period, including the following information: the date of the training event, the number of employees who attended the training event, and the objective of the training event. The permittee provided a copy of its FY2020 training plan which discussed frequency of employee training and the objectives of the training events, but did not include dates that the training events took place and how many staff members were in attendance. Please provide a list of the training events that took place during the FY2020 annual reporting period in accordance with Part I.E.6.m of the MS4 permit and include the dates of the training events and number of attendees.

- a. In previous years we had been able to gather employees in a room and provide the training to a group, due the COVID-19 pandemic this was not possible for FY2020. Training was implemented August 3rd in a web based platform utilizing a 30 minute informational video and a follow up worksheet where staff would answer questions from the video. Training closed one month later with a total of 26 responses. This training was sent to County of York staff across the Department of Public Works and the York County School District. We believe this response rate is heavily affected by the COVID-19 pandemic. Additionally it is worth noting many of the staff in labor positions do not have constant access to computers, nor do they check their emails regularly.
3. The permittee is required to provide an update on the implementation of the Chesapeake Bay TMDL Action Plan annually, including the following information, as described in Part II.A.13.a-d of the MS4permit: a list of BMPs implemented during the reporting period but not reported to the DEQ BMP Warehouse in accordance with Part I.E.5.g., and the estimated reduction of pollutants of concern achieved by each and reported in pounds per year, a statement if credits were acquired, and a list of BMPs that are planned to be implemented during the next reporting period. The MS4 annual report appears to be missing attachment 7.a, which may include the information required. Please provide the requested update on the Chesapeake Bay TMDL Action Plan implementation as described above.
- a. BMPs that have been implemented during the reporting period that were not reported to the DEQ BMP Warehouse

Basin	TP (lbs/yr.)	TN (lbs/yr.)	TSS (ton/yr.)
VIP US RT 17 BMP	27.90	88.71	---
Greensprings	110	239	210.01
Cook-Falcon BMP	13.5	59.1	8,869.4

- b. The County of York did not acquire any additional credits.
- c. Second Phase Removal Requirements remaining after completed projects:

Basin	TP (lbs/yr.)	TN (lbs/yr.)	TSS (ton/yr.)
James River	6.12	49.5	2340
York River	88.5	-5280	44.877

Figure 1: This comes from Special Conditions 2nd Phase Chesapeake Bay Action Plan (Annual Reports 2018/Final PDFs)

No projects planned for the James River Basin have been completed for phase two; Siege Lane and Charles Brown Park Stream Restoration are planned.

York River Nitrogen Reduction $(88.71+239+59.1) = 386.81 + (-5820) =$
 $-6,206.81$ lbs/yr. surplus Nitrogen removal

York River Phosphorus Reduction $(110+13.5+29.70) = 153.2 - 88.5 =$
 -64.7 lbs/yr. surplus Phosphorus removal

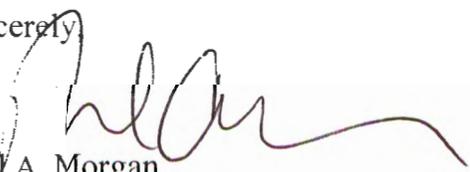

York River Suspended Sediments $(X + 210.01 + 8,869.4) = 9,079.41 - 44,877 =$
 $35,797.59$ lbs/yr. Suspended Sediments to be removed.

d. Proposed BMP: Charles Brown Park Stream Restoration

Basin	TP (lbs/yr.)	TN (lbs/yr.)	TSS (ton/yr.)
Protocol 1: Credit for preventing sediment during storm flow	156.05	338.84	18,131.07
Protocol 2: Credit for In-stream and Riparian nutrient processing within the hyperheic zone during base flow	0	321.20	0
Protocol 3: Credit for floodplain re-connection volume	.004	.05	1.7
Totals	156.05	660.10	18,132.77

If you have any questions, please call Amy Green at 890-3765.

Sincerely,

Neil A. Morgan
 County Administrator

NAM/lm

Second Phase Chesapeake Bay Action Plan

Prepared by York County Public Works

August 29, 2018

MS4 Service Area Update

In accordance with the DEQ Guidance Memo No. 15-2005 for the Chesapeake Bay TMDL Special Conditions, the County is updating their MS4 service area utilizing the Urban 2010 Census area to develop the next phase TMDL action plans. The updated MS4 service area delineations follow the same process as discussed in the guidance memo and the County's Chesapeake Bay TMDL Action Plan but instead utilizes the 2010 census area.

MS4 Boundary and Exclusion Areas

The MS4 was initially defined as the urban areas, based on the 2010 Census data, within the York County boundary. Land areas covered by other MS4 permits or VPDES permits, forested lands, and open water areas were then excluded from the MS4 area. Land areas that drain by surface flow onto lands currently served by the County MS4 were accounted for, because they contribute to the County's pollutant removal requirement. Similarly, areas that drain by surface flow to other MS4s were excluded.

The table below includes both the numbers for the previous MS4 service area as calculated utilizing the urban 2000 census area and the updated MS4 service area as calculated with the urban 2010 census area. It was assumed that the VPDES permits and other MS4s, VDOT roads, forested areas, agricultural areas, and open waters data files that were utilized in the previous MS4 service area were the most up to date datasets and were utilized in the development of the updated MS4 service area. The surface inflow and outflow files were updated as part of this effort based on the 2010 urban census polygon.

After evaluating the 2010 urbanized census area and the initial exclusion area files (forest, open water, VDOT, and other permittees), it was noted that there were significant land areas that appeared to be wetlands that were within the preliminary MS4 service area. The DEQ Guidance Memorandum GM-162006, TMDL Action Planning for Local TMDLs as Required in the Small MS4 General Permit (VAR04) Effective July 1, 2013 indicates that wetlands can be excluded from the MS4 service area. To determine total wetland exclusion area, the most recent National Wetlands Inventory (NWI) dataset was downloaded from the U.S. Fish and Wildlife Service on March 30, 2018. Areas associated with the wetland exclusion dataset are presented in the table below.

Areas of Inclusion and Exclusion from the MS4 Service Area		
	MS4 Service Area Utilizing Urban 2000 Census Area (ac)	MS4 Service Area Utilizing Urban 2010 Census Area (ac)
York County Boundary	68,355	68,355
Census Urbanized Areas within County	23,601	25,302
Exclusion Areas		
VPDES Permits and Other MS4s (Excluding VDOT)	1,395	2,619
VDOT Roads	2,172	2,329
Forested Areas	8,483	8,499
Agricultural Areas	N/A	N/A
Open Water	595	717
Wetlands	N/A	2,421
Surface Outflow	1,637	1,294
Total Exclusion Area (Non-Overlapping) ^a	12,436	13,931
Inclusion Areas		
Surface Inflow	346	195
Total Inclusion Area	346	195
Total MS4 Service Area for Pollutant Load Calculations	11,511	11,566

a. The total exclusion area is less than the sum of the individual exclusion areas because some of the individual exclusion areas overlap.

The MS4 Service Area for pollutant load calculations is virtually the same utilizing the 2010 census area as the 2000 census area. Therefore, the pollutant removal requirements from the Phase 1 Action Plan remain unchanged.

Based on the first phase action plan, York County has the following removal requirements for the Second Phase:

Basin	Nitrogen	Phosphorus	Total Suspended Solids (TSS)
James River	91.6	14.72	5,800
York River	2220	366	112,400

York County has completed the following projects in the James River Basin from our Phase 1 Chesapeake Bay Action Plan:

Project	Nitrogen Removed	Phosphorus Removed	TSS Removed
Cook/Falcon Phase I	42.1	8.60	3,460

York County has completed the following projects in the York River Basin from our Phase 1 Chesapeake Bay Action Plan:

Project	Nitrogen Removed	Phosphorus Removed	TSS Removed
H-1 Pond	171.0	45.6	12,330
Dare Stream Restoration	191.6	93.4	24,300
Edgehill Stream Restoration	150.0	136.0	30,200
Cook/Falcon Phase I	13.8	2.50	693
Septic to Sewer Conversions	7,514	0	0
Totals	8,040.4	277.5	67,523

Second Phase Removal Requirements remaining after completed projects:

Basin	Nitrogen	Phosphorus	TSS
James River	49.5	6.12	2340
York River	-5820	88.5	44,877

Projects Planned for the James River:

Currently we have two projects under design in the James River Basin which are expected to be completed by 2023. They are Siege Lane Stormwater Treatment Facility and the Charles Brown Park Stream Restoration Project.

The Siege Lane Stormwater Treatment Facility is a level 2 stormwater retention pond proposed for the corner of Siege Land and RT 17. The site has approximately 50 acres draining to it with moderate development and no water quality treatment.

The Charles Brown Park Stream Restoration Project entails approximately 875 linear feet of derogated stream with a total drainage area of around 63 acres.

We anticipate the following pollutant removal rates from these projects:

Project	Nitrogen	Phosphorus	TSS
Siege Lane	75.9	19.1	5,567
Charles Brown Park Stream Restoration	64.9	59.5	13,223
Total	140.8	78.6	18,790

Second Phase Removal after planned projects for the James River:

	Nitrogen	Phosphorus	TSS
Remaining Requirement after completed projects	49.5	6.12	2340
Anticipated Removal from Projects under Design	140.8	78.6	18,790
Anticipated Surplus Removed	91.3	72.48	16,450

Projects Planned for the York River:

We currently have six projects under construction or design. Cook/Falcon Phase II Pond and Stream Restoration, as well as the Greensprings Stream Restoration were included as future projects in our first phase action plan. Cook/Falcon Phase II is currently under construction and Greensprings Stream Restoration is nearing final design. We also have four new projects under design; Poquoson Headwaters Pond and Stream Restoration, Country Lane Pond, Goodwin Neck Complex Stream Restoration, and Bypass Road Stream Restoration.

Poquoson Headwaters Pond and Stream Restoration is a restoration of 1,650 linear feet of the Poquoson River between Ft. Eustis Blvd and Country Lane.

Country Lane Pond is a level 2 stormwater retention pond between Rt. 17 and Country Lane, just upstream from the Poquoson Headwaters project.

Goodwin Neck Complex Stream Restoration includes a stormwater pond for the York County facilities on Service Drive as well as downstream improvements.

Bypass Road Stream Restoration includes over 2,000 linear feet of stream restoration.

We anticipate the following pollutant removal rates from these projects:

Project	Nitrogen Removed	Phosphorus Removed	TSS Removed
Cook/Falcon Phase II and Wormley Creek Stream Restoration	85.0	35.0	12,900
Poquoson River Headwaters Stream Restoration	179.5	82.5	316,000
Greensprings Stream Restoration	105.0	95.2	21,200

Country Lane Stream Restoration	60	15	10,000
Goodwin Neck Road Stream Restoration	85.0	35.0	12,000
Bypass Road Stream Restoration	280.0	130.0	22,000
Totals	795	393	394,000

Second Phase Reduction after planned projects for York River:

	Nitrogen	Phosphorus	TSS
Remaining Requirement after completed projects	-5820	88.5	44,877
Anticipated Removal from Projects under Design	795	393	394,000
Anticipated Surplus Removed	6620	304	349,000

Conclusion

As demonstrated above, York County has met our Phase I goals and has sufficient projects completed or under design to meet the Phase II Chesapeake Bay TMDL Action Plan requirements.

It is important to note, York County has also partnered with HRSD in their SWIFT initiative and will be able to acquire any required pollutant removal credits from them if our plan falls short of the required reductions.

RE: MS4 Annual Report Review
York County, VA
VAR040028

Transmitted electronically to Ms. Amy Green via (amy.green@yorkcounty.gov)

Dear Ms. Green:

The MS4 Annual Report for York County, dated September 14th, 2020, has been reviewed for completeness and technical accuracy. Based on this review, the MS4 Annual Report is not complete and additional information will be needed as outlined below. Please note that this is not meant to be a comprehensive review of the MS4 program.

Please review the corrective actions, as outlined below, and provide a response to DEQ addressing these items no later than Monday, November 23rd, 2020.

1. In accordance with Part I.E.3.e.(3)(a)-(f) of the MS4 permit, the permittee is required to submit with the annual report a list of illicit discharges to the MS4 including spills reaching the MS4 with the following information: the source of the illicit discharge, the dates that the discharge was observed, reported or both, whether the discharge was discovered by the permittee during dry weather screening, reported by the public, or other method (describe), how the investigation was resolved, a description of any follow-up activities and the date the investigation was closed. The permittee provided descriptions of four illicit discharge investigations for the FY2020 annual reporting period but neither included the date the discharge was discovered (or reported) nor the date the investigation was closed. Please provide the dates of each illicit discharge's discovery and the date that each investigation was closed.
2. In accordance with Part I.E.6.q.(5)(a)-(c) of the MS4 permit, the permittee is required to provide a list of the training events performed during the reporting period, including the following information: the date of the training event, the number of employees who attended the training event, and the objective of the training event. The permittee provided a copy of its FY2020 training plan which discussed frequency of employee training and the objectives of the training events, but did not include dates that the training events took place and how many staff members were in attendance. Please provide a list of the training events that took place during the FY2020 annual reporting period in accordance with Part I.E.6.m of the MS4 permit and include the dates of the training events and number of attendees.
3. The permittee is required to provide an update on the implementation of the Chesapeake Bay TMDL Action Plan annually, including the following information, as described in Part II.A.13.a-d of the MS4 permit: a list of BMPs implemented during the reporting period but not reported to the DEQ BMP Warehouse in accordance with Part I.E.5.g. and the estimated reduction of pollutants of concern achieved by each and reported in pounds per year, a statement if credits were acquired, and a list of BMPs that are planned to be implemented during the next reporting period. The MS4 annual report

appears to be missing attachment 7.a, which may include the information required. Please provide the requested update on the Chesapeake Bay TMDL Action Plan implementation as described above.

Additionally, please review the following recommendation as outlined below. Please be advised that this recommendation does not require any action from you at this time, but is instead provided to assist you in implementation of your MS4 program.

1. Ensure that the MS4 permit number (VAR040028) is included with future annual reports, as required in Part I.D.2.a. of the MS4 permit.

Thank you for submitting your annual report and for your efforts implementing the MS4 program. If you have any questions or require assistance please contact me via email at david.a.taylor@deq.virginia.gov. I look forward to working with you on your MS4 program implementation.

Sincerely,

A handwritten signature in black ink, appearing to read "David A. Taylor", with a long horizontal flourish extending to the right.

David A. Taylor
Regional MS4 Coordinator
