VDOT TO IMPLEMENT SAFETY IMPROVEMENTS AT YORK COUNTY INTERSECTION

New 4-way stop intersection configuration coming to Goosley Road and Old Williamsburg Road

YORK COUNTY — The Virginia Department of Transportation (VDOT), in conjunction with York County, will soon begin work to enhance safety at a local intersection.

Based on the findings of a roadway safety analysis conducted with York County, VDOT will implement a new stop traffic configuration at the intersection of Goosley Road and Old Williamsburg Road starting as early as Oct. 9, weather permitting.

To improve motorists' safety, modifications will be made to reconfigure the traffic flow through the intersection, requiring all vehicles to come to a stop at each approach before entering the intersection. Benefits of implementing an all-way stop include a significant reduction in fatal and serious injury crashes with minimal increase in travel time.

On Goosley Road, crews will install warning signage and yellow reflective strips northbound approaching the intersection along with a new stop sign and delineator posts on the centerline markings for traffic control to prevent wrong-way entry into the southbound slip lane. A new stop sign will also be installed southbound on Emily Road.

On Old Williamsburg Road, crews will install additional warning signage, pavement markings, new yellow reflective strips in both directions, and new stop signs. Dual yield signs with red reflective strips will also be installed on the slip lane southbound onto Goosley Road.

In order to complete this work, crews will be onsite directing traffic under flagger control on Goosley Road and Old Williamsburg Road in the vicinity of the intersection from 7 a.m. to 3 p.m. daily, starting as early as Oct. 9 through Oct. 10.

All work is weather-dependent and subject to change.
